Claims 1, 2, 8, 18, 19, 22, 24-26, 29, 31, 32, 39, 40 and 43-47 are allowed. Claims 3-7, 9-17, 20, 21, 23, 27, 28, 30, 33-38, 41 and 42 were canceled by applicant under a preliminary amendment, filed 4/24/2006. All pending claims thus being allowable, prosecution on the merits is closed in this application.

Reasons for Allowance

The following is a statement of reasons for the indication of allowable subject matter: the prior art taken either singly or in combination fails to anticipate or fairly suggest the features/limitations of applicant's sole independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. More specifically, in regard to independent claim 1, the prior art taken either singly or in combination fails to anticipate or fairly suggest an apparatus for displaying a lenticular image comprising, *inter alia*, a lenticular image sheet and a lenticular lens sheet arranged in a housing so as to allow relative sliding motion between the image and the lens; "wherein at least one lug projects from said one of said lens sheet or image sheet, the apparatus further including at least one bearing arranged to support said at least one lug during said relative sliding movement" (Claim 1, Lines 7-10), taken together in combination with the totality of particular features/limitations recited therein.

Other Remarks/Information

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be labeled "Comments on Statement of Reasons for Allowance."

The International Search Report (PCT/ISA/210) and the Written Opinion of the International Searching Authority (PCT/ISA/237) prepared by the European Patent Office on 03/03/2005 and 01/05/2006, respectively, for the parent application (PCT/EP2004/012092) for the instant National Stage application. All of the documents and other material cited in the PCT/ISA/210 and PCT/ISA/237 have been considered by the examiner in the prosecution of the instant application.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Privas et al. (International Publication No. WO 01/17637) was cited in the Written Opinion of the International Searching Authority (PCT/ISA/237) prepared for the parent application (PCT/EP2004/012092). McKinley (U.S. Patent No. 7,210,257) discloses a self-actuating lenticular display. Hunt (U.S. Patent Publication No. 2004/0027311) is a published version of a related application, ASN 10/428,380 (now abandoned).

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
